

I'm human

Environmental Management by Chris Barrow (3rd Edition) DOI: Subjects: Environment & Agriculture, Environment and Sustainability, Geography This comprehensive third edition delves into the nature of environmental management, introducing readers to the rapidly evolving field. It explores challenges, opportunities, and core concepts like sustainable development, divided into five sections: Part I (Introduction): Four introductory chapters cover the justification for environmental management, its theory, scope, goals, and scientific background. Part II (Practice): Environmental management in economics, law, business, and its connection to environmentalism, international agreements, and monitoring are examined. Part III (Global Challenges): Resources, challenges, and opportunities - both natural and human-caused or human-aggravated - are explored. Part IV (Responses): Mitigation, vulnerability, resilience, adaptation, and how technology, social change, and politics affect responses to global challenges are discussed. Part V (The Future): The final chapter looks ahead at the future of environmental management. With its structured approach, effective illustrations, and foundation for further learning, this book is accessible to all. It's an essential reference for undergraduates and postgraduates studying environmental management and sustainability, as well as students on courses including environmental science, studies, and human geography. Introduction to Environmental Management The book "Introduction to Environmental Management" provides an accessible understanding of complex environmental issues in practical terms. It covers regulations, pollutants, and waste management, offering students and practitioners knowledge applicable across various fields and industries. The new edition includes eleven new chapters on topics such as water conservation and industrial ecology, expanding the coverage. Richard Marcantonio, a distinguished scholar-practitioner at the University of Notre Dame's Mendoza College of Business, has been actively involved with several prominent organizations. He served on an advisory committee for the US Environmental Protection Agency (EPA) and co-created the Integrated Pest Management (IPM) education program in partnership with the National Environmental Health Association and the Centers for Disease Control and Prevention. As a teaching assistant professor, Marcantonio focuses on environmental management and peacebuilding through his work at the Kroc Institute for International Peace Studies. His extensive research spans five continents and various communities, often collaborating with government agencies, private institutions, and non-profit organizations to drive positive change for both humans and the environment. Notably, he is the author of "Environmental Violence: In the Earth System and the Human Niche," published by Cambridge University Press in 2022.
