In the top right corner of your browser, click the down arrow in the search box. Click Find More Providers. Select Google. Check the box next to "Make this my default search provider." Click Manage Search Providers. Click Add. Firefox Open Firefox. In the small search bar in the top right of your browser, click Search. Click Change Search Settings. Under "Default Search Engine," select Google. Safari Open Safari. Click the search bar. In the left corner of the search bar, click the magnifying glass. Select Google. Android browser Open your browser app. It could be called Internet or Browser. Tap the Menu button on your phone or at the top right of the browser. Tap Settings Advanced Set search engine. Tap Google. Search widget Important: This feature is available on new devices distributed in the European Economic Area (EEA) on or after March 1, 2020. On your Android phone or tablet, open the Google app . At the top right, tap your Profile picture or initial Settings. Tap Search widget Switch to Google. Tip: Learn how to set Google as your homepage. Post to the help community Get answers from community members Here are a few tips and tricks to help you easily find info on Google. No matter what you look for, start with a simple search like where's the closest airport?. You can add more descriptive words if needed. If you're looking for a place or product in a specific location, add the location in your search. For example, bakery seattle. To search with your voice, tap the Microphone. Learn how to search with your voice. Tip 3: Choose words carefully Use terms that are likely to appear on the site you're looking for. For example, instead of my head hurts, say headache, because thats the term a medical site uses. Tip 4: Do not worry about the little things Spelling: Google's spell checker uses the most common spelling of a given word, regardless of how you spell it. Capitalization: A search for New York Times is the same as a search for new york times. Tip 5: Find quick answers For many searches, Google provides answers directly in the search results. Some features, such as details about sports teams, aren't available in all regions. Weather: Search weather to find the weather in your location or add a city name, like weather seattle, to find weather for a certain place. Dictionary: Put define in front of any word to find its definition. Calculations: Enter a math equation such as 3*9123, or solve complex graphing equations. Unit conversions: Enter any conversion, such as 3 dollars in euros. Sports: To find a schedule, game scores, and more, search for the name of your team. Quick facts: Search for the name of a celebrity, location, movie, or song to find related info. Expert Search tips Post to the help community Get answers from community members You can quickly get to Google every time you open your browser by making Google your homepage. Change your homepage Choose a browser below, then follow thesteps on your computer.If you don't see your browser below, go to the "Help" section of your browser and look for information on how to change your browsers homepage. Firefox Open your browser and visit www.google.com. Dragthetab to the Home button, thenrelease. Click Yes. Google Chrome In the top right corner of your computer's browser, click More Settings. Under "Appearance,"turn onShow home button. Select your current homepage or Enter custom web address. Then, enter: www.google.com. Safari In the top left corner of your screen, select Safari PreferencesGeneral. Next to "New windows open with" and "New tabs open with,"selectHomepage. Next to"Homepage,"enter: www.google.com. Internet Explorer In the menu bar on the top of your browser, click Tools. Select Internet Options. Click the General tab. Under "Home page," enter: www.google.com. Click OK. Restart your browser. Microsoft Edge In the upper right corner of your browser, select More Settings. Under "Set your homepage," click the Down arrowA specific page or pages. If you have a current homepage: Next to the URL, click X. Click *Enter a URL*. Then, type:www.google.com. Google is stuck as my homepage Google won'tchange your homepage settings without your permission. Reset your homepage. Choosea browser above, then follow the steps to replace Google with the site you want as your homepage. Check for unwanted programs. If resetting your homepage doesn't fix the problem, you might have unwanted programscalledmalware that's imitating the Google site. Learn about malware and how to remove it. Post to the help community Get answers from community members If a network you use, including VPN networks, seems to be sending automated traffic to Google Search, you might get the message Our systems have detected unusual traffic from your computer network. What to do when you get this message The message most likely shows a reCAPTCHA. To confirm that youre a person and not a robot, solve the reCAPTCHA. After you solve it, the message goes away, and you can use Google again. If you don't get a reCAPTCHA, check if: Your browser is supported by reCAPTCHA JavaScript is enabled Learn how to solve a reCAPTCHA. What to do if you continue to get the message Here's what you can do if you continue to get the "Unusual traffic from your computer network" message: Learn how to detect and remove malware. You or another user on your network might have malware, which is malicious software that can be installed on your computer without your knowledge. Some malware can cause Google to show this message. Contact your network administrator or IT professional to help you locate the source and stop the problem. You could get this message if others that use the same network you use, like at a school or business, are sending automated searches to Google. Uninstall the VPN from your computer or network, or contact your VPN provider. You could get this message if others that use the same Virtual Private Network (VPN) you use are sending automated searches to Google. This can also happen with IPv6 tunnel services. Some VPNs and tunnel services cause all traffic to be blocked because they make it impossible for Google to tell the difference between abusive and non-abusive traffic. Contact your internet provider about the error. You could get this message if others that use the same internet provider you use are sending automated searches to Google. What to do if youre a network administrator or provider If you administer a network or are an internet service or VPN provider, locate the sources of automated traffic to Google and block them. Once the automated searches have stopped, your users should be able to search normally on Google. Network administrators or others should thoroughly review before they buy IP space from an IP broker. If possible, ask to test the network first to make sure it can access major websites and doesnt have any existing blocks on it. What Google considers automated traffic Searches sent from these sources: Robots Computer programs Automated services Search scrapers Use of software that sends searches to Google to find how a website or web page ranks on GoogleThere are different ways to filter your Google searches to be more precise or to expand in new directions. Advanced search Google offers pages designed to help you perform specialized web and image searches: Google Advanced Search Google Advanced Image Search Filters & topics After you perform a search, filter and topic buttons appear near the search bar. They may also appear in other places on the page. Filters Filters allow you to narrow results to a particular type, such as: The "Web" filter contains text-based links to websites. The exact filters and the order in which they appear is dynamic. It's based on what our systems might think are most helpful to your query. If you don't find a particular filter that you want, use the "All" option to check others that are available. Topics Topics allow you to add terms to your query that can help you get more specific information or explore related information. Relevant topics for a query are automatically generated and displayed. They're based on what our systems understand about how people search and how content is analyzed across the web. Topics are available on computers for most countries or regions, and they'll expand to more countries or regions and languages on mobile. Operators To narrow your results in specific ways, you can use special operators in your search. Do not put spaces between the operator and your search term. A search for [site:nytimes.com] will work, but [site: nytimes.com] won't. Here are some popular operators: Search for an exact match: Enter a word or phrase inside quotes. For example, [tallest building]. Go to our blogpost for more information about how to search using quotes. Search for a specific site: Enter site: in front of a site or domain. For example, [site:youtube.com cat videos]. Exclude words from your search: Enter - in front of a word that you want to leave out. For example, [jaguar speed -car]. Related results After you click a web result and return back to the search results, you may find more related results added to what was originally generated. These added results are related to the web result that you clicked on. Related searches After a search, you find related searches to what you originally searched for. Related searches are automatically generated based on what our systems understand about how people search. Settings In Google Search, you can use settings that allow you to match or remove certain types of content: Related resources
