The content linked through UMANG is owned and maintained by the respective Ministries/Departments of Centre & State. Last Updated On: 22 July 2025 | v-21.2.22 Use Aadhaar Freely Recently, UIDAI has issued an advisory asking people not to share their Aadhaar number openly in the public domain especially on Social Media or other public platforms. Does this mean that I should not use Aadhaar freely? Open or Close You should use your Aadhaar without any hesitation for proving your identity and doing transactions, just like you use your bank account number, PAN card, debit card, credit card, etc., wherever required. What UIDAI has advised is that Aadhaar card should be freely used for proving identity and doing transactions, but should not be put on public platforms like Twitter, Facebook, etc. People give their debit card or credit card details or cheque (which has bank account number) when they purchase goods, or pay school fee, water, electricity, telephone and other utility bills, etc. Similarly, you can freely use your Aadhaar to establish your identity as and when required without any fear. While using Aadhaar, you should do the same level of due diligence as you do in case of other ID cards not more, not less. If Aadhaar has to be freely used for proving identity and it is safe to do so, then why has UIDAI advised people not to put up their Aadhaar number in Social Media or public domain? Open or Close You use PAN card, debit card, credit card, bank cheques wherever required. But do you put these details openly on internet and social media such as Facebook, Twitter, etc.? Obviously no! You do not put such personal details unnecessarily in public domain so that there is no unwarranted invasion attempt on your privacy. The same logic needs to be applied in case of uses of Aadhaar. I gave my Aadhaar card to a service provider for proving my identity. Can anyone harm me by knowing and misusing my Aadhaar number? Open or Close No. Just, by knowing your Aadhaar number, no one can harm you. To prove your identity, Aadhaar number is verified/authenticated by agencies through various modes as prescribed under Aadhaar Act, 2016. Why am I asked to verify Bank account, Demat account, PAN and various other services with Aadhaar? Open or Close Aadhaar verification/authentication is governed by the sections of Aadhaar Act, 2016, under which the use case has been notified by the concerned Ministry/Department for providing services. Does linking my bank account, PAN, and other services with Aadhaar make me vulnerable? Open or Close No. UIDAI does not have visibility of linking of your Aadhaar with any other services. Concern departments such as bank, income tax etc. do not share any information of Aadhaar number holder neither UIDAI stores any such informations. E-Aadhaar What supporting software needed to view e-Aadhaar? Open or Close Aadhaar number holder needs 'Adobe Reader' to view digitally verified e-Aadhaar. To install Adobe Reader in the System visit What Is the Password of e-Aadhaar? Open or Close Only someone with an Aadhaar linked to a registered mobile number can create Aadhaar profile in the mAadhaar app. They can register their profile in an App installed in any smartphone. However the OTP will be sent to only their registered mobile. Steps to register Aadhaar profile are given below: 1. Launch the app.2. Tap on the Register Aadhaar tab on the top of main dashboard3. Create a 4 digit Pin/Password(memorize this password, as it will be required to access profile)4. Provide Valid Aadhaar & enter valid Captcha5. Enter Valid OTP and submit6. The profile should get registered7. The registered tab would now display the registered Aadhaar Name8. Tap on My Aadhaar tab on the bottom menu9. Enter 4-digit Pin/Password10. My Aadhaar Dashboard appears Aadhaar Paperless Offline e-kyc How this Aadhaar Offline Paperless eKYC document is different from the other identification documents produced offline by individuals? Open or Close Identity verification can simply be accomplished by providing an identity document like PAN card, Passport etc to the service provider. However, all these documents, which may be used for identification can still be forged and faked which may or may not be possible to verify offline instantaneously. The document verifier has no technological means to verify the authenticity of the document or the information it contains and has to trust the document producer. Whereas, the XML file generated by the Aadhaar number holder using Aadhaar Paperless Offline e-KYC is digitally signed document using UIDAI digital signature. Thus, the service provider can verify the demographic contents of the file and certify it to be authentic when doing the offline verification Can this Offline Paperless eKYC document be shared to other entities by the Service Provider? Open or Close Service Providers shall not share, publish or display either XML or Share Code or its contents with anyone else. Any non-compliance of these actions shall invite actions under Sections 29(2), 29 (3), 29(4) and 37 of The Aadhaar Act, 2016 (as amended) and sub regulation 1A of regulation 25, regulation 14A of The Aadhaar (Authentication and Offline Verification) Regulation, 2021 and regulation 6 and 7 of The Aadhaar (Sharing of Information) Regulation, 2016. How will service providers use Aadhaar Offline e-KYC? Open or Close The process of Aadhaar Offline e-KYC Verification by Service Provider is: Once service provider obtains the ZIP file, it extracts the XML file using the password (share code) provided by the Aadhaar number holder. The XML file will contain the demographic details such as Name, DOB, Gender and Address. Photo is in base 64 encoded format which can be rendered directly using any utility or plane HTML page. Email Address and Mobile number are hashed. Service Provider has to collect Email Address and Mobile number from Aadhaar number holders and perform below operations in order to validate the hash: Mobile Number: Hashing logic: Sha256(Sha256(Mobile+ShareCode))\*number of times of last digit of Aadhaar Number Example : Mobile number: 9800000002 Aadhaar Number: 123412341234 Share Code: Abc@123 Sha256(Sha256(9800000002+ Abc@123))\*4In case if Aadhaar Number ends with Zero or 1 (123412341230/1) it will be hashed one time.Sha256(Sha256(9800000002+ Abc@123))\*1 Email Address: Hashing Logic: This is a simple SHA256 hash of the email without any salt Entire XML is digitally signed and Service Provider can validate the XML file using the signature and public key available on the UIDAI website. ( . How to share this Paperless Offline eKYC document with the service provider? Open or Close Aadhaar number holders can share the XML ZIP file along with the Share Code to the service provider as per their mutual convenience. Who are the users of this Aadhaar Paperless Offline e-KYC? Open or Close Any Aadhaar number holder who desires to establish his/her identity to any service provider (OVSE) using digitally signed XML downloaded from UIDAI website can be a user of this service. The service provider should have provisions of providing this Aadhaar Paperless Offline e-KYC at their facility and do the offline verification How to generate Offline Aadhaar XML? Open or Close The process of generating Aadhaar Offline e-KYC is explained below: Go to URL Enter Aadhaar Number or VID and enter mentioned Security Code in screen, then click on Send OTP. The OTP will be sent to the registered Mobile Number for the given Aadhaar number or VID. OTP will be available on m-Aadhaar mobile Application of UIDAI. Enter the OTP received. Enter a Share Code which be the password for the ZIP file and click on Download button The Zip file containing the digitally signed XML will be downloaded to device wherein the above mentioned steps have been performed. The Offline Aadhaar XML can also be downloaded from mAadhaar app. What is Aadhaar Paperless Offline e-KYC? Open or Close It is a secure sharable document which can be used by any Aadhaar number holder for offline verification of Identification. An Aadhaar number holder desirous of using this facility shall generate his/her digitally signed Offline XML by accessing UIDAI website. The Offline XML will contain Name, Address, Photo, Gender, DOB, hash of registered Mobile Number, hash of registered Email Address and reference id which contains last 4 digits of Aadhaar Number followed by time stamp. It will provide Offline Aadhaar Verification facility to service providers/Offline Verification Seeking Entity (OVSE) without the need to collect or store Aadhaar number.
